

Oracle: create schema

🌐 Language: [Deutsch](#) · [English](#)

🔧 Oracle: create schema

Manually create tablespace, user and schema for Nuclos in Oracle – if you don't use the @create.sql script.

HOW-TO

OPERATIONS

UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

On this page

Prefer the script

If available, prefer the @create.sql script – it reliably grants all required privileges. Use the steps below only when working without the script.

a) Create tablespace

```
CREATE TABLESPACE DAT_<tablespacename> DATAFILE '<oracle-tablespace-verzeichnis>/dat_<tablespacename>.ora' SIZE 100M AUTOEXTEND ON NEXT 5M MAXSIZE UNLIMITED;
```

b) Create user and schema

```
CREATE USER <schemaname> IDENTIFIED BY <passwort> DEFAULT TABLESPACE DAT_<tablespacename> TEMPORARY TABLESPACE TEMP;  
GRANT CONNECT TO <schemaname>;  
GRANT DBA TO <schemaname>;  
GRANT CREATE ANY SEQUENCE TO <schemaname>;  
GRANT CREATE ANY VIEW TO <schemaname>;  
ALTER USER <schemaname> DEFAULT ROLE ALL;
```
