Overview

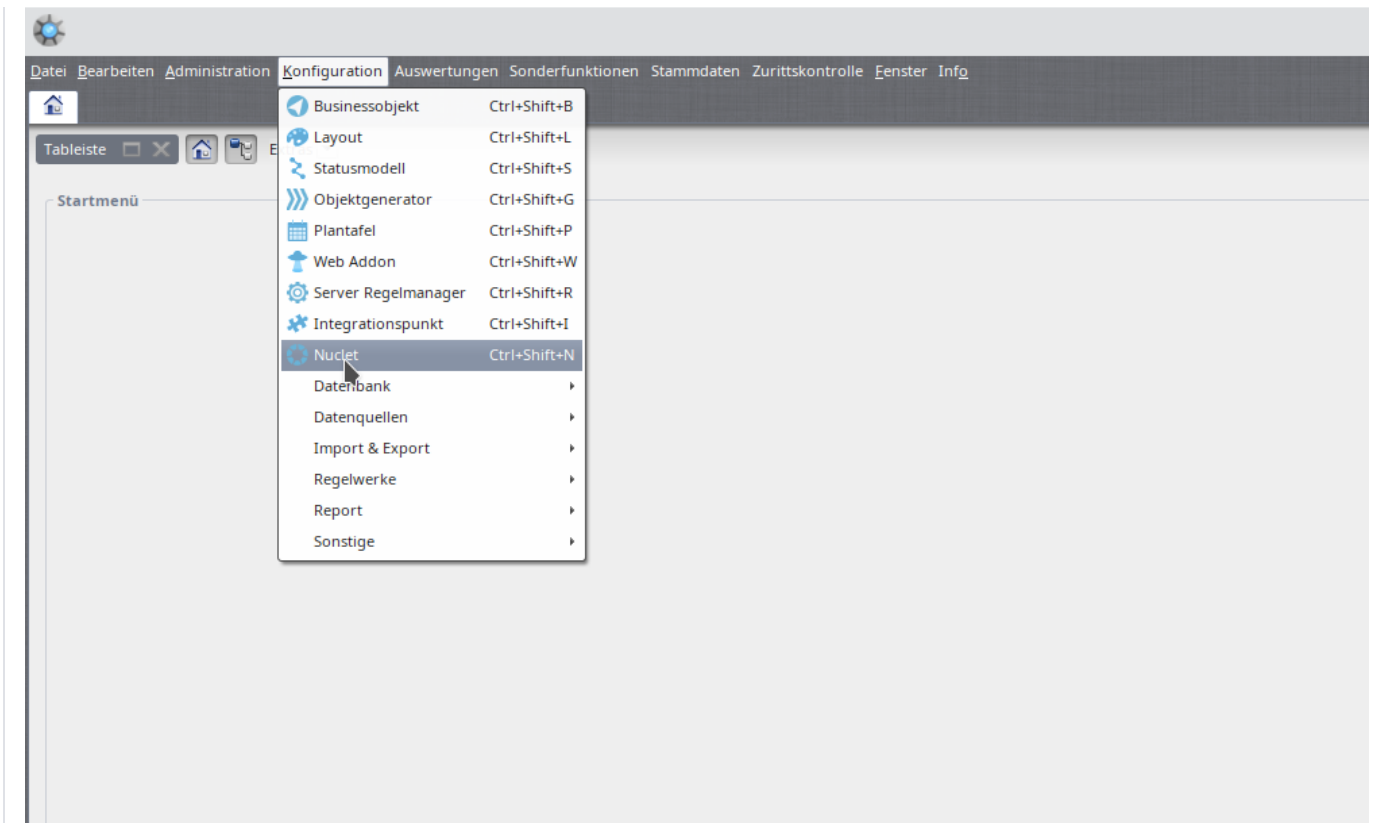

The **base Nuclet for trading companies** covers standard processes (quote, order, purchase order, delivery note, invoice, credit note) and manages master data for customers, suppliers and articles. It's a good starting point for your own processes and a richer learning example. It already includes the number-ranges, email and warehouse Nuclets.

Download

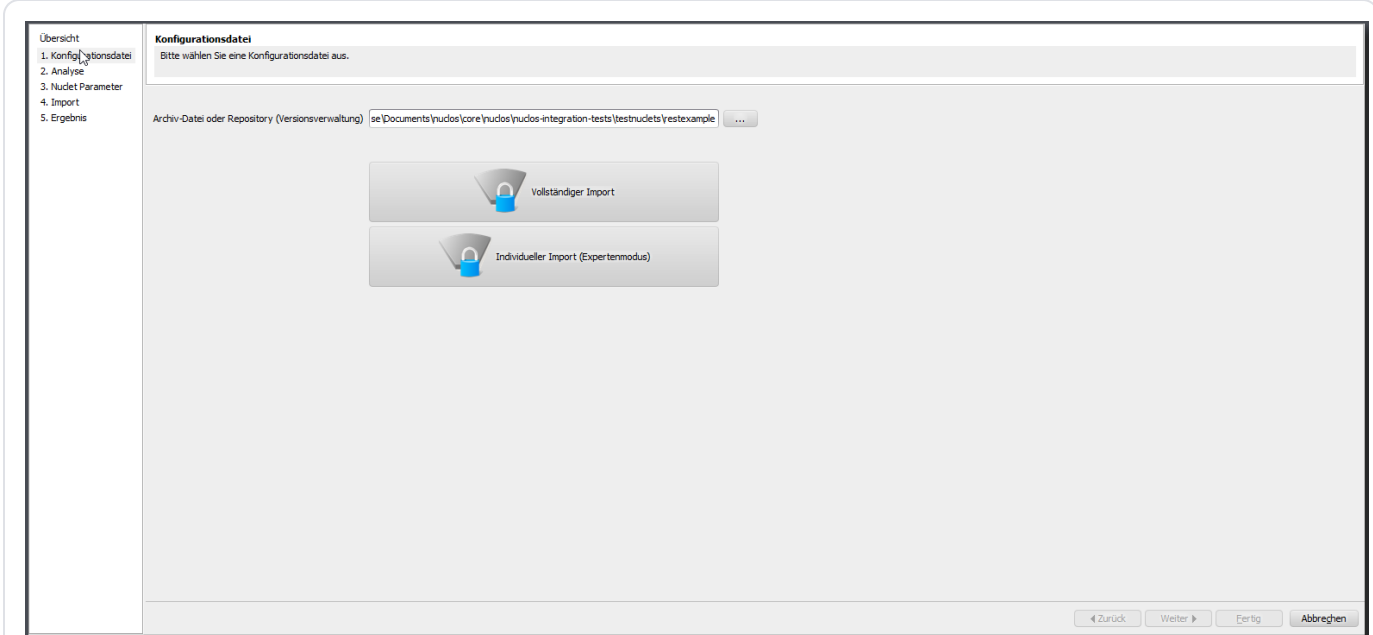

Download it from the [Nuclet Shop](#).

Import

1. Start the Rich Client as a super user (user `nuc los`, empty password).
2. Open Nuclet management via *Open configuration*.
3. Click *import* in the Nuclet management tab.
4. In the import wizard, pick the downloaded base Nuclet via the „...“ button.
5. Choose **Full import** and complete the wizard.

Open Nuclet management.

Nuclet import wizard.

Integration after import

1	Run the „Initial Dataload“ job (see job control).
2	Run the integration steps of the „Email“ Nuclet. Number ranges are handled by „Initial Dataload“; the warehouse Nuclet is pre-integrated.

3	Define a default warehouse and storage location under „Warehouse“.
4 (optional)	Configure your own VAT ID in the „VAT ID“ Nuclet parameter.
