Bulk editing of multiple records.

1. Select records in the result list (Shift + click).
2. Choose *Edit* (button or context menu).
3. The form shows only values equal across *all* objects; differing fields are highlighted.
4. Changes apply to *all* selected objects; a summary appears after saving.

Status change

If all objects share the same status (action/system object), a status change is possible too.
