APPLIES TO NUCLOS APP 1.0

On this page

- [Edit rows](#)
- [Related pages](#)

The app shows subforms as their own **cards** within the detail view. When no subform layout exists, the app derives the columns from the sub-entity's metadata.

Edit rows

- Child rows are loaded on demand (lazy load).
- In edit mode you can **add, change and delete** rows.
- A row opens as a **full-screen editor** with a title and status header like the main view.

 **Saved together**

Subform changes are saved together with the parent record.
