Creating forms with Jaspersoft Studio

Project foundation in Jaspersoft Studio – create and structure projects.

KONZEPT

APPLICATION DEVELOPER

UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

Create a project in Jaspersoft Studio

In Jaspersoft Studio, **projects** manage data adapters, reports etc. This is how you create a project:

1. Right-click in the *Project Explorer*.
2. Choose *New Project...*
3. In the wizard under *Jaspersoft Studio* choose *JasperReports Project* and *Next*.
4. Enter the project name and confirm with *Finish*.

Tip

For complex projects, sub-folders (Reports, Templates, Data Adapters, Resources) help keep an overview.
