Localizing nuclets

The localization feature makes your nuclet multilingual – layout texts and rule messages are managed and translated centrally.

 **Availability**
Version history: from 4.2025.15 to 4.2025.28 as **beta**, released from 4.2025.29.

Topics

- [Localizing layouts](#) – ensure unique component identifiers.
- [Localizing rules](#) – make rule-API messages translatable.

 **Central administration**
How the feature is administered centrally (languages, translators, release) is described in **Administration Localization**. Read the *Nucle*t and *R*ule API sections there.
