

5. Creating a business object (BO)

🌐 Language: [Deutsch](#) · [English](#)

🔧 5. Creating a business object (BO)

Create a BO via REST – fetch a blank via defaultGeneration and POST it to insert.

HOW-TO

DEVELOPER

UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

On this page

- [Sending the create](#)
- [Related pages](#)

To create a record, first fetch a **blank** via the defaultGeneration link (boGenerations/{boMetaId}). Nuclos pre-fills it with the configured default values and lists all possible attributes – anything not needed can be removed.

Reference attributes

Pitfall: **reference attributes** (e.g. customer) must contain the id. The name field is not mandatory but must be at least an empty string "".

Sending the create

Send the object via **POST** to the insert link contained in the blank (equals the BO list link /bos/{boMetaId}). The response contains the created object including its id.
