📖 3 SEPA: Prerequisites

From version 2.0.0 the SEPA Nuclet provides export functionality for both SEPA direct debits and SEPA credit transfers – you only prepare the use case you actually need.

Machine-translated – under review

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

From version 2.0.0, the SEPA Nuclet provides export functionality for both SEPA direct debits and SEPA credit transfers.

When integrating the SEPA Nuclet, you only need to consider the use case that you actually require in your target Nuclet.

The two following subsections describe the necessary prerequisites for each use case:

[3.1 Prerequisites for the "direct debits" use case](#)

[3.2 Prerequisites for the "credit transfers" use case](#)
