Machine-translated – under review

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

Necessary integration steps

The SEPA Nuclet is integrated in 10 steps:

[4.1 Nuclet import](#)

[4.2 Object imports](#)

[4.3 Adjustments in the file system](#)

[4.4 Adjustments in the business object editor](#)

[4.5 Data sources](#)

[4.6 Layout adjustments](#)

[4.7 Configuration of the Nuclet parameters](#)

[4.8 Source-code adjustments in Java rules](#)

[4.9 Rule management](#)

[4.10 Master data initialization](#)

All integration steps are explained in detail in the subordinate sections.
