 Machine-translated – under review

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

Please assign the following server rules to the business objects actually used in the target Nuclet:

Rule library	Type	Java rule	Rule assignment	Business object
SEPA	Update	CheckSEPAMandateChange	target Nuclet	the debtor object used (customer, member, person, etc.)

 General information on rule management can be found [here](#).
