 Machine-translated – under review

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

Error message	Instance of ... might not have been initialised (SPA.483.001)!
Cause	The instance of the specified class that is used was not initialised, i.e. the call to the initialize method of this class is probably missing.
Solution	Please check 1. the integration step 4.8.3 and 2. the Nuclet parameters "SEPA Direct Debit Export" and "SEPA Credit Transfer Export" from integration step 4.7.
