This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

Notes on the background of the necessary adjustments

In version 1.2 of the SEPA Nuclet, the business object "SEPA Payment Information" was replaced by the business object "SEPA Transaction".

In this way the structures in the SEPA Nuclet match the XML structures of the SEPA messages.

5.2.1 Business objects

Business object	Nuclet	necessary adjustments after the Nuclet update	additional notes
SEPA Transaction	SEPA	configuration of the reference attributes "Debitor" and "Reference"	see section 4.4.2
PaymentReference	target Nuclet	1. remove the reference attribute to "SEPA Payment Information" 2. add a reference attribute to "SEPA Transaction"	see section 4.4.1

5.2.2 Java rules

Java class	Java package	Nuclet	necessary adjustments after the Nuclet update	additional notes
PaymentReferenceWrapper	<i>your.nuclet.sepa.wrapper</i>	target Nuclet	1. add the method setSEPATransactionId(Long) 2. delete the method setSEPAPaymentInformationId(Long)	see section 4.8.1
PaymentReferenceFacade	<i>your.nuclet.sepa.facade</i>	target Nuclet	1. add the method getSEPATransactionIdAttribute() 2. delete the method getSEPAPaymentInformationIdAttribute()	see section 4.8.2
