 **Machine-translated – under review**

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

The adjustments of the Java rules are made in three steps.

Please follow the instructions in the following subordinate sections.

Subsection	Description
4.7.1 Nuclet interfaces	adapting wrapper classes to the actually used business objects
4.7.2 Business object facades	definition of the actually used business object classes and attributes
4.7.3 State change	definition of relevant state changes

Table 4.7: Application-specific adjustments in Java rules

All necessary adjustments are explained in detail (class by class) in these sections.

 When updating the MT940 Nuclet, there is a risk that your adjustments in the Java rules are overwritten.

To avoid this, please also observe the [recommendations in the next section](#).
