 **Machine-translated – under review**

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

3.3.1 Setting up an output directory

It is necessary to set up a file directory for storing the CSV export files.

Access to this directory must be possible and permitted for the Nuclos server, i.e.

- the directory is to be set up on the server on which the Nuclos server is installed
- or
- the server on which Nuclos is installed must be connected to this directory.

 The Nuclos service requires read and write permissions for this directory for the export operations.
