

Development with Nuclos

 Language: [Deutsch](#) · [English](#)

Development with Nuclos

Everything for developers – development environment, REST, testing, web client, database and troubleshooting around Nuclos.

CONCEPT

DEVELOPER

UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

Central entry point to **developing with Nuclos**: from setting up the development environment, through the REST interface, testing and web client extension, to database, migration and troubleshooting.

Getting started

New here? Start with the [development environment](#) and the [API conventions](#).
