Releases

Version	Date	Notes	Compatibility
1.0.2	14.10.2019	First published version	from Nuclos 4.35.4 from Postgres 9.6
1.0.3	xx.10.2023	JR extensions integrated via Nuclet	from Nuclos 4.37.0

Overview

The "Forms for trading companies" Nuclet is an extension of the "Base Nuclet for trading companies" Nuclet. It contains print outputs (see also [Forms](#)) for quotation, sales order, credit note, delivery note, invoice and purchase order.

Integration

The integration after a successful Nuclet import (see [Nuclet import](#)) is to be carried out as follows.

Step	Description
1 (bis < 4.37.0)	Set the system parameter required for the JasperReports forms (see Jasper extensions in Nuclos). After setting this parameter, the Nuclos service unfortunately currently has to be restarted once more.
2 (bis < 4.37.0)	Before running a form for the first time, unfortunately each form currently still has to be saved once under Configuration (see also NUCLOS-8393 - Abrufen der Vorgangsdetails... STATUS)

3 (optional)	Adjust the company logo in the menu item Resource . Make sure it is a ".png" file. Adapt the data source "Form footer"
