📖 Notes on Nuclos 3.14

Special upgrade notes for Nuclos 3.14 beyond the regular release notes.

REFERENCE ADMINISTRATORS **UPDATED: JUL 2026** APPLIES TO NUCLOS 4.2026.X

On this page

**Machine-translated – under review**

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

The notes on this page highlight special changes that require separate mention beyond the release notes. This applies in particular when upgrading to a new Nuclos release requires certain additional preceding or subsequent measures that must be observed to avoid unwanted behavioral changes or side effects introduced by new features.

**Generation of business objects adjusted**

For reference fields inside business objects, an incomplete format check was used when generating the method names. As of version 3.14.0 this is completed. In this step, special characters such as " _ " are filtered out of the names, as already happens for other field names. As a result, newly generated business objects can differ from those of earlier versions. To ensure backward compatibility, the "old" method names are kept/still generated, but annotated with "Deprecated".
