📖 Notes on Nuclos 4.20

Special upgrade notes for Nuclos 4.20 beyond the regular release notes.

REFERENCE

ADMINISTRATORS

UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

On this page

Machine-translated – under review

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

The notes on this page highlight special changes that require separate mention beyond the release notes. This applies in particular when upgrading to a new Nuclos release requires certain additional preceding or subsequent measures that must be observed to avoid unwanted behavioral changes or side effects introduced by new features.

References to other BOs

New references to other BOs are only possible within the same Nuclet ([NUCLOS-6296](#)). Existing cross-Nuclet references remain unchanged and are still supported. With this new restriction we want to promote the use of the new integration points. See also [Integration points](#)
