UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

On this page

Machine-translated – under review

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

The notes on this page highlight special changes that require separate mention beyond the release notes. This applies in particular when upgrading to a new Nuclos release requires certain additional preceding or subsequent measures that must be observed to avoid unwanted behavioral changes or side effects introduced by new features.

With Nuclos 4.2022.40 the version of the "Jsch" library was raised to 0.2.5. As a result, further encryption algorithms are now available in Jsch. This update is only relevant for projects that use "Jsch" in rule code. More information about the functionality of the updated library can be found on the [GitHub page](#).
