UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

On this page

Machine-translated – under review

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

The notes on this page highlight special changes that require separate mention beyond the release notes. This applies in particular when upgrading to a new Nuclos release requires certain additional preceding or subsequent measures that must be observed to avoid unwanted behavioral changes or side effects introduced by new features.

Explicit tree activation

As of this version, trees in Nuclos are disabled by default and must be explicitly activated via the BO wizard for the business objects in which they are to be displayed. To do this, the "Enable tree view?" checkbox must be set in the BO wizard under "Label and tree display".

Since trees have also been available in the web client since Nuclos 4.2023.6, this is intended to provide a uniform configuration option for both clients to show or hide the button for opening the tree in the user interface.
