📖 Notes on Nuclos 4.2024.26

Special upgrade notes for Nuclos 4.2024.26 beyond the regular release notes.

REFERENCE ADMINISTRATORS **UPDATED: JUL 2026** APPLIES TO NUCLOS 4.2026.X

On this page

**Machine-translated – under review**

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

The notes on this page highlight special changes that require separate mention beyond the release notes. This applies in particular when upgrading to a new Nuclos release requires certain additional preceding or subsequent measures that must be observed to avoid unwanted behavioral changes or side effects introduced by new features.

**Tomcat update to 9.0.95**

The Tomcat version was raised from 9.0.88 to 9.0.95.

Users who deploy Nuclos via the .war archive must extend CATALINA_OPTS with the following parameter: -Dorg.apache.catalina.connector.RECYCLE_FACADES=false

No action is required for users of the other installers.
