📖 Notes on Nuclos 4.2025.19

Special upgrade notes for Nuclos 4.2025.19 beyond the regular release notes.

REFERENCE ADMINISTRATORS **UPDATED: JUL 2026** APPLIES TO NUCLOS 4.2026.X

On this page

**Machine-translated – under review**

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

The notes on this page highlight special changes that require separate mention beyond the release notes. This applies in particular when upgrading to a new Nuclos release requires certain additional preceding or subsequent measures that must be observed to avoid unwanted behavioral changes or side effects introduced by new features.

**nuclos-addon-api adjustment**

As of Nuclos 4.2025.19 the matrix Y-axis column configuration in the web client is stored in a preference. This required an update of the nuclos-addon-api.
Projects that use WebAddons must also update their WebAddons when upgrading to this Nuclos version by changing the nuclos-addon-api version number from 0.1.45 to 0.1.46 .
