Notes on Nuclos 4.25

Special upgrade notes for Nuclos 4.25 beyond the regular release notes.

REFERENCE ADMINISTRATORS **UPDATED: JUL 2026** APPLIES TO NUCLOS 4.2026.X

On this page

**Machine-translated – under review**

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

The notes on this page highlight special changes that require separate mention beyond the release notes. This applies in particular when upgrading to a new Nuclos release requires certain additional preceding or subsequent measures that must be observed to avoid unwanted behavioral changes or side effects introduced by new features.

**DEPRECATED_2017_ALLOWED**

The system parameter DEPRECATED_2017_ALLOWED is now set to "false" by default. See

**VLP on ComboBox (dropdown)**

VLPs on a combobox now behave like on a LOV. In particular, differences in the display can now occur if a different display is assembled in the reference field than in the VLP. In this case you can simply remove the display name in the layout. Optionally you can also remove the column from the VLP since it is no longer used. If you want a different sort order, a display name must be configured in the VLP! See
