Notes on Nuclos 4.31

Special upgrade notes for Nuclos 4.31 beyond the regular release notes.

REFERENCE ADMINISTRATORS **UPDATED: JUL 2026** APPLIES TO NUCLOS 4.2026.X

On this page

**Machine-translated – under review**

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

The notes on this page highlight special changes that require separate mention beyond the release notes. This applies in particular when upgrading to a new Nuclos release requires certain additional preceding or subsequent measures that must be observed to avoid unwanted behavioral changes or side effects introduced by new features.

**Eclipse plugin**

To work around the bug [NUCLOS-7779 - Abrufen der Vorgangsdetails...](#) **STATUS**, the Eclipse plugin version 4.31.0 is required.

The name also changed with the new version: org.nuclos.ide.feature nuclos-ide-feature. Before installing the new plugin version you must uninstall the old version, otherwise both versions are installed in parallel, which leads to duplicate menu entries, among other issues.
