📖 Notes on Nuclos 4.46

Special upgrade notes for Nuclos 4.46 beyond the regular release notes.

REFERENCE ADMINISTRATORS **UPDATED: JUL 2026** APPLIES TO NUCLOS 4.2026.X

On this page

**Machine-translated – under review**

This page was machine-translated from German as a first draft and is currently under review. The authoritative source remains the **German original** (see the language switch above).

The notes on this page highlight special changes that require separate mention beyond the release notes. This applies in particular when upgrading to a new Nuclos release requires certain additional preceding or subsequent measures that must be observed to avoid unwanted behavioral changes or side effects introduced by new features.

**BO-specific and user-group permission for list export**

Error during Postgres database setup

PostgreSQL: creating the schema automatically is only attempted if it does not yet exist.

Error message extended when the schema cannot be created in the PostgreSQL DB.

**BO-specific and user-group permission for list export**

Self-registration: incorrect activation link for user names containing spaces

The HTML encoding of the spaces is missing. Further characters may also need to be replaced or excluded when choosing the user name.

**BO-specific and user-group permission for list export**

Users are created without a password

When a user creates a new user in the desktop client, the new user is always created without a password, even if a password was entered.
