

User admin

Language: [Deutsch](#) · [English](#)

User admin

Delegate user management without super user – the user admin flag and its effect on permissions.

KONZEPT

ADMINISTRATOR

UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

On this page

- [Behaviour](#)
- [Related pages](#)

The **user admin** flag lets you delegate user management *without* granting super user rights.

Behaviour

- A user admin always has **full access to the user screen**.
- Without an additional super user flag, **all other permission concepts** apply normally (module/master data/state model rights, attribute masking, etc.).
- If a user removes their super user flag and keeps only user admin, all menu items except the user screen disappear.

User admin without super user: only the user screen remains.

Important

Since the user admin always has full access to the user screen, they can assign themselves any groups – and give themselves back the super user flag.
