Install the app

The app runs on iOS and Android. Install it from the respective store or the build provided by your operator.

In preparation

Screenshots and store links will follow once the app is published.

Choose a server

On the login screen tap **Server: <host>** to expand the server picker. The default is `demo.nuclos.de`.

- Known servers appear as chips – tap to select.
- Use **Add server** to enter a new host (e.g. `demo.nuclos.de`) and confirm with „+“.
- Servers you no longer need can be removed via their chip.

Multiple instances

You can store several servers and enable biometric login per server independently.
