Find business objects

The **Business objects** tab lists all objects grouped by their **main menu point**. The search field filters across all groups.

Records of a list

Tapping a business object opens its record list. It is fully metadata-driven – title and columns come from the object's metadata.

- **Full-text search** – the search field queries records on the server.
- **Paging** – more records load as you scroll.
- When empty, „No records“ is shown; with no hits „No matches for ...“.

 **Go to a record**
Tap a record to open the [detail view](#).
