

Charts in the designer

🌐 Language: [Deutsch](#) · [English](#)

💡 Charts in the designer

Charts in JasperReports templates – based on JFreeChart, with customizer and image classes.

KONZEPT

APPLICATION DEVELOPER

UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

Charts in reports & forms

Just like the Nuclos [charts](#) feature, you can also embed charts in reports and forms using Jaspersoft Studio. The basis – as in Nuclos – is `jfreechart-1.0.19.jar`, so all chart types are available.

Important

Customizer classes (an interface per chart) and image classes (e.g. dial charts) are created in an external project and added to the Nuclos class path. **All classes must reside in a single package** – the JasperReports API does not recognise multiple packages.
