Import & export in Nuclos

Menu: [Configuration](#) [Import & Export](#).

Nuclos imports and exports data via configurable structures. Find the details on these pages:

- [Structure definition](#) – building import/export structures.
- [Object import](#) – import records.
- [XML structure definition](#) / XML import file – XML-based exchange.

Configuration vs. data

To transport **whole application parts** (entities, layouts, rules ...) use [nuclets](#) instead of data import.
