

Print a form

 Language: [Deutsch](#) · [English](#)

Print a form

Print forms from the detail view – including the advanced print dialog and print service.

- HOW-TO
- USER
- UPDATED: JUL 2026
- APPLIES TO NUCLOS 4.2026.X

On this page

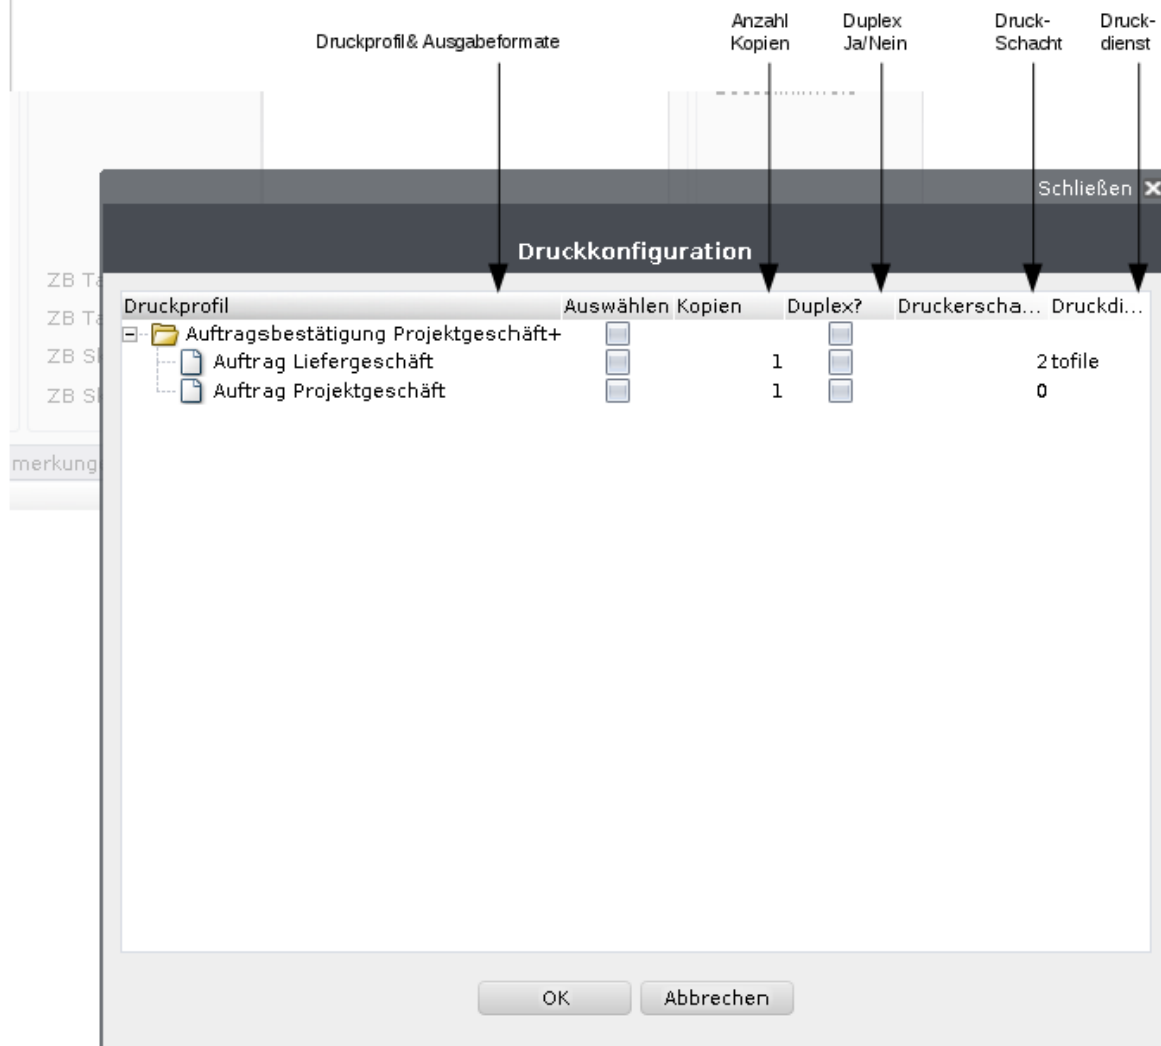

- [Advanced print dialog](#)
- [Print preview & mandatory print](#)
- [Related pages](#)

Forms are created from the [detail form](#) via the **Print** button. Depending on configuration the file is saved or shown directly.

Advanced print dialog

 **Version**
Available from Nuclos 4.5.

Adjustable parameters: number of copies, duplex, paper tray, print service (server printer). Print profiles are grouped by form; a „+“ marks groups from several forms.

Advanced print dialog.

On confirmation, all selected output formats go to the Nuclos print spooling, which distributes jobs per user to the print services.

Print preview & mandatory print

The preview opens by double-clicking a print profile. Output formats defined as mandatory are pre-selected and cannot be deselected.
