Version & right

Available from Nuclos 4.2023.27. Non-super users need the system right **Configure dashboard**.

Create a dashboard

Switch to the dashboard (Nuclos gear, top right). Create a new dashboard via the „+“ tab at the top left; the configuration opens immediately.

Neues Dashboard + >

Konfigurationsmodus: Neue Dashboard-Elemente können aus dem Menü rechts gewählt und via Drag-and-Drop auf dem Dashboard verschoben werden. 🗑️ ↗️

Dashboard configuration.

Configure a chart

On the right there are two chart dropdowns (filled with task lists/data sources and search filters). Pick an entry a tile is created. Use the config gear to set the values (y) and category column (x).

Ungültige Diagrammkonfiguration.

Chart configuration with category and values.

Prerequisites

Important: the task list must have at least one numeric field. Recommendation: keep under 10,000 rows. Choose a sensible category column, otherwise nothing or 0 is shown.

By default the bar chart appears; chart type and name are adjustable.

Enable for users

- Enable the task list for the user group.
- In the Web Client under *Manage settings* enable the dashboard and task list for the group.
