

Print service

🌐 Language: [Deutsch](#) · [English](#)

🔧 Print service

Define output targets for printing – create server-specific print services and predefine them in forms.

HOW-TO

ADMINISTRATOR

UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

On this page

- [Create & use](#)
- [Related pages](#)

Menu *Administration* *Print service*. Print services represent the **printers/output targets** available in the system.

Server-specific

Print services are **server-specific** and therefore **not part of a nuclet** – they are created per Nuclos server.

Create & use

Print services created here can then be predefined under *Configuration* *Report* *Forms* and are offered to the user for selection when printing.

Druckdienst - Neueingabe

Suche Liste Details Extras ⓘ

Name Mein Druckdienst

Beschreibung Dies ist ein Druckdienst der in Nuclos verwendet werden soll.
