The **Dashboard** tab renders the server-defined dashboards. The desktop grid is re-flowed into a single column of chart and task-list cards.

Chart types

- **Bar** (default),
- **Line/area**,
- **Pie/donut**.

Data is loaded per chart from the server. Use **Refresh** to reload the dashboard; pull-to-refresh is supported too.

 **When nothing is shown**
If a dashboard contains only widgets that cannot be shown on mobile, the app says so. With no dashboards „No dashboards“ appears.
