

Nuclet Wiki

🌐 Language: [Deutsch](#) · [English](#)

💡 Nuclet Wiki

Central hub for all Nuclets – ready-made building blocks, integrations and code examples to reuse.

KONZEPT **EVERYONE** **UPDATED: JUL 2026** **APPLIES TO NUCLOS 4.2026.X**

The **Nuclet Wiki** bundles information about all available **Nuclets** – reusable building blocks made of ready-to-use business objects, layouts, status models and rules that you can adopt in your own Nuclos application.

**Availability & access**

Nuclets are provided in the **Nuclet download area** on [nuclos.de](#) (part of the [Nuclos Services](#)). Downloading requires registration and the corresponding subscription.

Categories

Category	Content
Interfaces	Integration Nuclets (SEPA, CAMT, MT940, DATEV, e-invoicing ...)
Modules	Domain modules and extensions
Base Nuclets	Comprehensive example Nuclets as a starting point
Supporting Nuclets	Helper Nuclets for recurring tasks
Tutorial	Build your own Nuclets step by step

The Nuclet Wiki is also the central source for **rule and code examples**. You may freely use all examples provided here for your own purposes.
