

Search editor

🌐 Language: [Deutsch](#) · [English](#)

🔧 Search editor

For complex searches: the search editor builds conditions as a tree with AND/OR combinations.

HOW-TO

USER

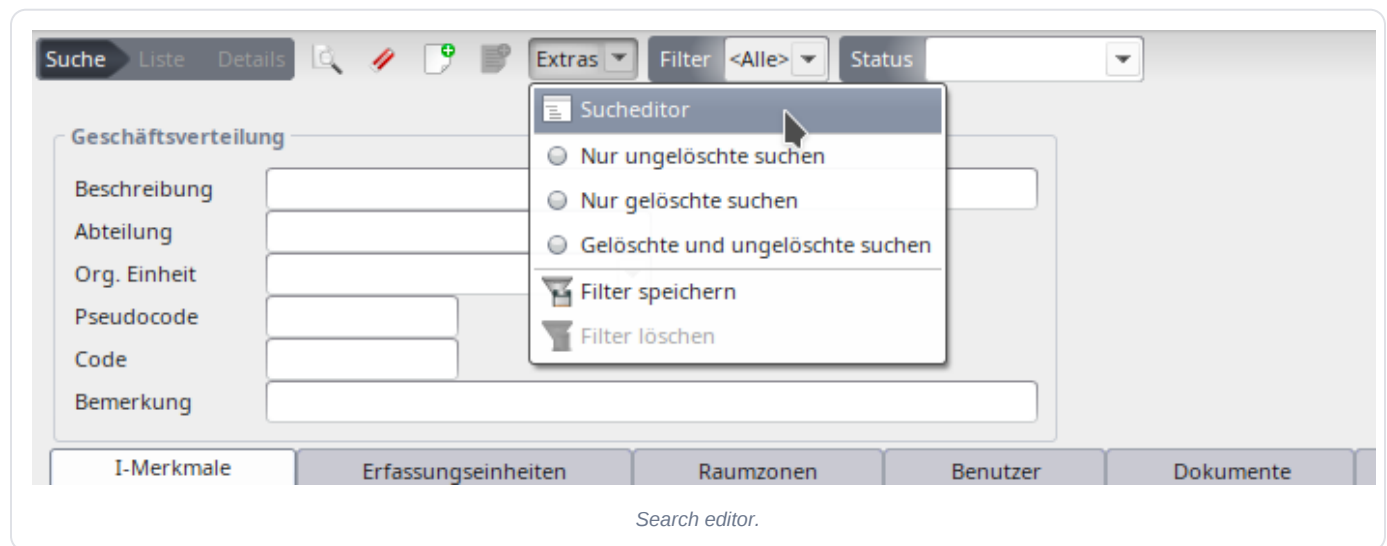

UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

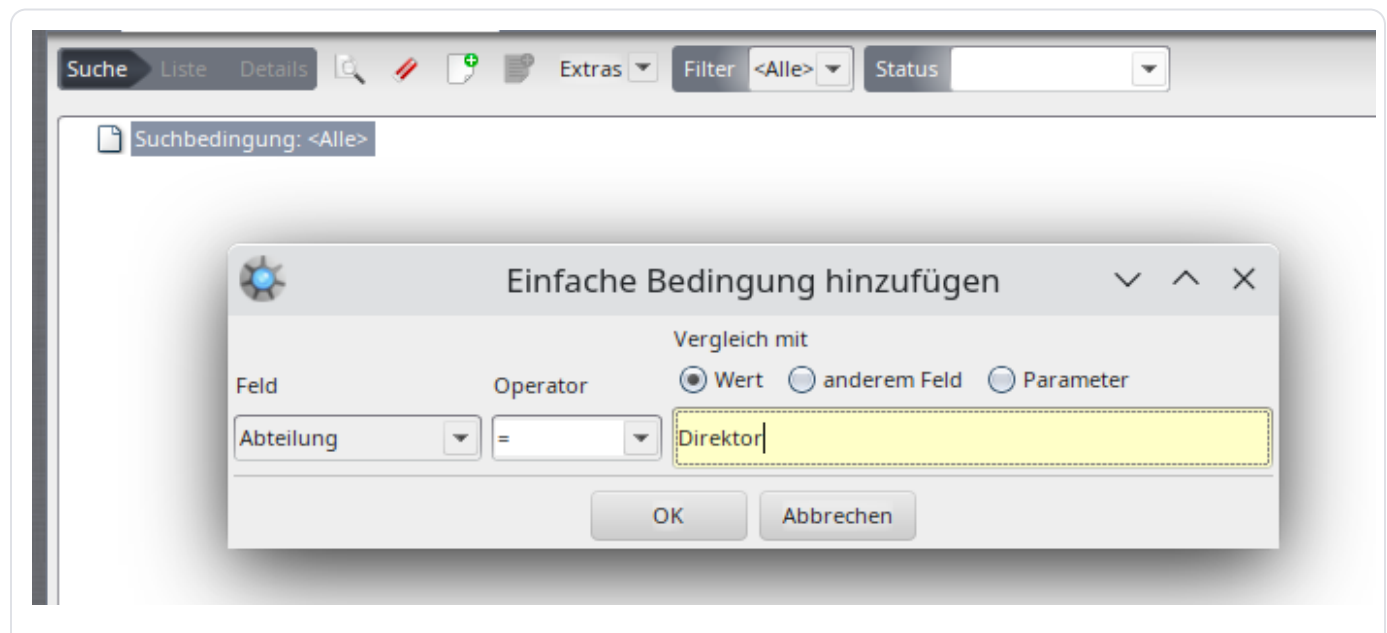

On this page

Activate the search editor via the **Search editor** button in the search form (and deactivate it the same way).

Use the context menu to edit the formula: edit, remove, cut, copy branches. Add new conditions via **Simple condition**; under **Field** the available search fields are suggested.

Conditions in the tree.

Note

Once a field has more than one condition, the editor can no longer be deactivated – delete the condition first.
