Releases

Version	Date	Notes	Compatibility
5.4.0	01.08.2020	First published version	from Nuclos 4.43.0
			from Postgres 12.0

Overview

The example Nuclet for service companies maps the processes of a service provider, in particular an IT service provider, such as customer management, project and task management, project billing, invoicing and time tracking. The example Nuclet can serve as a starting point to map your own individual processes on top of it, or to adapt the existing processes to individual circumstances.

As a more extensive example of an implementation of an ERP system, the example Nuclet for service companies is also excellently suited for getting started with development in Nuclos.

Integration

The integration after a successful Nuclet import (see [Nuclet import](#)) is to be carried out as follows.

Step	Description
1	Run the job "Initial Dataload", see also Jobsteuerung .
2	Carry out the integration steps of the Nuclet: Email sending .
3	...Location...
4	...
5	...
