Permissions of a user group.

General permissions

Permission	Explanation
------------	-------------

Working environment: create	May create working environments and window layouts.
Working environment: assign	May authorize user groups for working environments.
Working environment assigned: customize start tabs	May change tabs of own working environments.
Print task list	May print task lists.
Call business object	May create and change business objects.
Configure dashboards (web)	May configure web dashboards.
Configure charts (web)	May configure web charts.
Share settings	May share settings with others.
Run report	May run reports.
Start rule execution manually	May start rules manually (button in the form).
See deleted objects	May also search for deleted objects in search screens.
Export list	May export result lists as PDF/CSV/Excel.
Run management console	May open the management console.
Export nuclelet	May export nuclelets.
Import nuclelet	May import nuclelets.
Call nuclelet wizard	May start the nuclelet transfer.
Delete objects physically	May delete physically, not only logically.
Call relation editor	May start the relation editor.
Resource planning	May configure resource planning/planning boards.
Perform bulk editing	May perform bulk editing from the result list.
Edit SQL manually (data sources)	May edit the SQL of data sources manually.
System start	May log in via the rich client.
Call test functions	May call test functions.
Edit translations	May enter metadata translations.
Run full-text search	May use full-text search.
Web client	May log in via web client and REST.
XML ex/import	May run XML export/import.

Module and master data rights

Access rights are defined per business object:

Module rights (BO with state model)	Master data rights (BO without state model)
Read	Read
Read/write	Read/write
Read/write/logically delete	Read/write/delete
Read/write/physically delete	–

Further permissions

- **Working environments:** assign the group to working environments.
- **Reports:** grant access to individual reports/forms.
- **Work steps:** execution of work steps defined in the object generator.
- **Record shares:** fine-grained sharing of individual records.
