Overview of the functions covered by the automated web client tests and the corresponding test cases (excerpt).

Functionality	Test case
Create / modify / delete BO (side view)	InsertUpdateDeleteTest
Matrix	MatrixTest
Search (link / search field / attributes)	SearchTest
State change	StateChangeTest
Subform entries (create/edit/delete/clone)	SubformTest
Subform layout rules	SubformLayoutrulesTest (partly TODO)
Tab order	TabindexTest
Table view (create/select/state change/delete)	TableviewTest
Column settings	TableviewChangeColumnsTest

 **Additional coverage**

Further checked aspects: data types (also in subforms and after language switch), default values, rule button, reference fields, LayoutML rules with VLP and opening records in a new tab.
