

Nuclet import via REST

🌐 Language: [Deutsch](#) · [English](#)

🔧 Nuclet import via REST

Import nuclets automatically via REST – super-user session, maintenance service and shell script.

HOW-TO

DEVELOPER

UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

On this page

- [Login and import \(curl\)](#)
- [Related pages](#)

From **Nuclos 4.8.0**, a nuclet import can be performed via the REST interface. A **super user** session is required to send the zipped nuclet to the maintenance service.

Nuclet parameters

The import itself has no settings yet. For nuclet parameters: new ones are imported, changed ones remain unchanged, deleted ones are removed.

Login and import (curl)

```
curl --fail --cookie-jar cookies.txt -X POST -H "Content-Type: application/json" \
-d '{"username":"nuclos","password":""}' http://localhost:8082/nuclos-war/rest
curl --fail --cookie cookies.txt -X POST -F "file=@nuclet.zip" \
http://localhost:8082/nuclos-war/rest/maintenance/nucletimport
```

A shell script (`nucletimport.sh`) automates the process; the Nuclos URL can be passed as the first parameter:

```
./nucletimport.sh http://localhost:8082/nuclos-war
```
