🔧 Operation

Operate business tests in the web client – standard, expert and detail views.

HOW-TO DEVELOPER **UPDATED: JUL 2026** APPLIES TO NUCLOS 4.2026.X

On this page

- [Standard view](#)
- [Expert view](#)
- [Detail view](#)
- [Related pages](#)

Prerequisite: the Nuclos server runs in **development mode**. The web client then offers three views under *Dev Business tests*.

Standard view

Via *Test automatically*, standard tests are generated, executed and the result summarized in an overview.

Expert view

Offers more options: generate/run tests separately, list all existing tests with their last status, edit or delete them (e.g. targeted tests of a nuclet).

Detail view

Shows all details of a test, allows editing and single execution as well as manual creation via *Create test manually*.
