📖 Web client test script for manual tests

Historical manual test script for the web client – browser matrix and expected/actual verification steps.

REFERENZ

DEVELOPER

UPDATED: JUL 2026

APPLIES TO NUCLOS 4.2026.X

Note

Historical manual test script (browser matrix Chrome/Firefox/Safari/IE, as of ~2017). For current testing, the automated [web client tests](#) are used.

The script describes manual verification steps (expected/actual) for the web client, e.g. sidebar layout, columns/sorting, status bar, scrolling/loading and creating and editing subform rows (date, date chooser, keyboard navigation). The actual columns documented browser-specific deviations of the respective version.
